Local and General

Happenings Here, There and Everywhere, Past Present and Future

Mr. J. A. McColl, M.P.P., and Mr. Geo. Campbell of Youngstown were in town last Thursday.

Mr. D. V. Boyer spent the week-end in Morrin. He returned Tuesday morning accompanied by Mrs. Boyer who has been visiting her daughter at Morrin.

Rev. Cummings, of Toronto, arrived in Chinook last Friday. Mr. Cummings is going to supply the Big Stone mission for the summer.

Miss N. C. Polhill, who has been on the staff of the local Branch of the Union Bank for the past year, left on Sunday morning for California where she will reside.

R S. Woodruff is still agent for D. E. Black & Co., Calgary, reliable watch repairs. Bring yours in for an estimate.

The following University students returned home from Edmonton last Friday: Misses B. Mitchell, Mary and Florence Rogers, of Cereal, and Hugh Horne, of Cappon.

Mrs. A. May, of Alsask, is visiting her daughter, Mrs. C. Wylie.

A. Wilson and J. Sullivan left on Monday for Cereal where they will build the Lutheran parsonage.

A farewell party was given to Miss N. C. Polhill last Saturday evening in the Arm's Hall. Miss Polhill left the next morning for Los Angeles.

Mr. Chas. Wylie and family moved into their new home on Second Avenue this week.

Parties are negotiating for a site at Drumheller for a packing house and cold storage plant.

Seeding is now general in the Chinook district. Mr. E. Noble expects to have four hundred acres seeded to wheat by the end of this week.

Miss Grace Smith, of Vancouver, arrived in town on Monday. She will teach school in the Langford district this summer.

Mr. M. T. Briggs, of Oyen, was a Chinook visitor last Friday.

Mrs. J. W. Lawrence left on Wednesday to visit friends in Sioux City, Iowa.

No woman wants to work in a hot kitchen when it is not necessary. See the Florence Oil stove at Woodruffs.

Miss Agnes Butt, of Hanna, spent the week end in town.

Mr. and Mrs. M. J. Hewitt and family motored to Oyen last Sunday.

Mr. Fred Belmont, one of our prosperous farmers south of town, finished seeding last Saturday.

Langford U.F.A. Sports To Be Held June 3

Fine Programme of Sports

Prominent U.F.A. Speakers Will Address the Gathering

The Langford U.F.A. Local are already making arrangements to hold a big Sports Day on June 3, King's birthday, at the Acadia Hall, Sec. 14-25-8, commencing at 10 a.m. A splendid program of horse races, baseball, basketball and other sports suitable for young and old will be put on. First prize for baseball will be \$40.00, second \$25.00 and probably a third prize.

During the day several prominent U.F.A. men will address the gathering. The committee are endeavoring to secure the presence of Mr. W. H. Wood, President of the U.F.A., and Mr. Robt. Gardiner, the U.F.A. candidate for the Medicine Hat riding.

A good time is assured all. Grand dance at night.

Baseball teams who wish to enter communicate with the U.F.A. Secretary, Langford Local, Chilmark P.O.

CARD OF THANKS

Mr. and Mrs. Robert Vanhook of Chinook, desire to thank their many friends for help and sympathy during their recent sad bereavement in the death of their infant daughter; also for the floral tributes.

New Principal Arrives

Mr. H. L. Manzer, the new principal of the Chinook Consolidated School, arrived in town on Tuesday. Mr. Manzer, who has had three years' experience in high school work, has just finished studying for his B.Sc. degree at the University in Edmonton.

CHANGE IN TRAIN SERVICE COMMENCING MAY 1st.

Westbound passenger 4 a.m. every day except Monday.
Eastbound passenger 1.33 a.m. except Sunday.

A farewell party was given on Monday evening to Mr. and Mrs. A. G. Glendenning who are shortly leaving town for Saskatoon.

Mrs. W. E. Brugnell and children left yesterday morning for Plain View, Neb., where they will visit relatives.

Mr. D. Keffington, of Lanfue, was a visitor in town on Tuesday.

The Shortage of Homes

While not prepared to fully accept the statement recently credited to Canada's only woman cabinet minister that this Dominion stands in need of one million new houses, which would mean that at the present time something more than one-half our estimated population of nine millions of people lack reasonable housing accommodation—most Canadians will readily agree that the provision of additional housing is one of the pressing needs of this country. Canada, however, is not peculiar in this respect; it is a condition which prevails in practically all countries, and constitutes a problem that is engaging the attention of people in Great Britain, the United States and other countries.

Dealing with the housing problem in Great Britain a short time ago, Lloyd George uttered one of those epigrams for which he is noted, and compressed in a few words a truth which it will be all statesmen, in fact all citizens, should recognize. He said: "You cannot maintain an A-1 empire with a C-3 population. You cannot bring up healthy people in unhealthy homes."

A lack of adequate and proper housing accommodation means the resorting to makeshifts, to overcrowding of people and whole families in buildings where the necessary conditions of sanitation required to maintain health cannot be observed; it means the use for purposes of habitation of buildings which should not be devoted to such purposes; it means a loss of that privacy in family life, the loss of which so frequently leads to a laxity in morals; it means, in fact, the physical and moral deterioration of the people and a consequent weakening of the nation. The effect on babies and young children, who are the hope and citizenship of the future, is positively dangerous and alarming.

Socially and economically the result of inadequate and bad housing is just as serious as it is in a physical way. When people are compelled to live cluttered together in a state of congestion, or in habitations which are not fit for human beings, unrest and general dissatisfaction with the prevailing order of things is engendered, and, as inevitably Governments and the present system of industrial life and society are blamed, radical socialistic and even revolutionary ideas and doctrines are accepted and spread, discontent grows, and the very life of the State is threatened, the while the physical standard is being lowered.

Revolutionary ideas and extreme socialistic doctrines seldom find much acceptance among people who are the owners of the dwellings in which they live. Ownership of a bit of land, and a house which becomes a permanent home, is the best possible guarantee of contentment within and stability for a nation. In Canada it is frankly recognized that the large percentage of the population engaged in agriculture and living on land of their own, and not as tenants, is the one outstanding reason why this Dominion has escaped to a greater extent than perhaps any other country the perils which have threatened the world following the upheaval of the Great War.

If not a million new houses, at least tens of thousands are required in Canada this year. Yet the prospect of obtaining them is remote unless some action is taken to meet the need. It cannot be met under existing conditions if left solely to individual effort, initiative, enterprise and available financial resources of individuals. Governments and municipalities have made some provision, but it is inadequate and haphazard in contrast with the importance and seriousness of the problem. Something further is required, and it would seem as if that "something" should be provided, not in the way of paternal Government assistance, but in the direction of encouragement of building operations all over the Dominion.

How is this to be done? In the humble opinion of the writer of this article, by Governmental action bringing about a lowering in the present costs of construction. Governments in Canada, Federal and Provincial, own and control millions of acres of forest and timber lands. They have it in their power to reduce the cost of lumber to the people of Canada by developing those resources on a large scale and in a scientific manner. By so doing they can provide employment for thousands of laborers and artisans, develop the natural resources of the country, and add immeasurably to the wealth and prosperity of the nation.

The cost of transporting needed commodities from one part of the Dominion to another has risen enormously in recent years because of increased freight rates. Admitting that increased rates were necessary to enable the railways to pay their way, it would nevertheless appear to be the part of statesmanship to reduce those rates on lumber and other building materials in order to build up the country.

Cheaper lumber in the first instance, and a lower cost for transporting it to those who want it and will gladly use it if they can obtain it at a reasonable price within their means, would operate as an immediate and tremendous factor in bringing about renewed building activity. This would provide an enormous volume of employment, and artisans with steady work and wages would soon begin to build homes for themselves. It would mean greater prosperity, less unrest, better health. Under present conditions even those who can possibly afford to build defer doing so because of a belief that sooner or later costs of construction will fall, and they would then be faced with a heavy depreciation in the value of properties constructed at present high prices. They, therefore, continue to occupy houses, paying unduly high rents for the time being, which houses would otherwise be made available at a more moderate figure for those who are not in a position to build for themselves.

Explorer Is Honored

Stefansson Gets Medal For Services Rendered to Canada.

Vilhjalmar Stefansson, the Canadian explorer, has been awarded the Founders' medals of the Royal Geographical Society, London. Mr. Stefansson is at present on a lecture tour in the United States, and he received a despatch at El Paso, Texas, from the secretary of the society, Arthur Parr Hickey, advising that His Majesty the King has approved of the award for his distinguished services to Canada in the exploration of the Arctic Sea. The Founders' medal fund was established by King William IV, in 1831 to encourage geographical science and discovery.

Western Produce Exchange.

A produce exchange has been formed at Winnipeg to handle butter, cheese, cream and poultry. Operations are to be begun at once. Quotations on these commodities will be collected from similar exchanges in the large cities of Canada and the United States.

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Knower.

Coal Industry in Saskatchewan.

The coal mining industry in Saskatchewan gave employment for the year ending March 31st, 1921, to 3,400 men. There were forty-five mines in this district under operation, and the total output of coal was 334,389 tons.

Leg that Wouldn't Heal

"Ever since a boy of fourteen," writes John Redmond, of West Frampton, Que. "I had trouble with a bad leg. I used many remedies. Though some appeared to heal the ulcer for a while, it always broke out worse than ever. This last time I suffered continuously for nine years, and the old remedies had absolutely no effect."

"The limb was in an awful state when someone advised me to get Zam-Buk right away. I had only used this herbal healer a few days when I began to see great improvement. So I continued the treatment, for even Zam-Buk, needed time to have complete effect. However, I am glad to tell you that it was only by the aid of Zam-Buk that the leg was eventually thoroughly healed. Never a sign of the ulcer since."

Only Needed Zam-Buk

30c. box, all dealers.

Another Ancient Civilization.

Ruins recently discovered in the vicinity of El Perote, State of Vera Cruz, reveal the existence of an ancient civilization hitherto unknown.

Idols discovered are neither of stone or clay, but of a curious bright substance heavy and looking like tin.

CHILDHOOD INDIGESTION

Nothing is more common in childhood than indigestion. Nothing is more dangerous to proper growth, more weakening to the constitution or more likely to pave the way to dangerous disease. Fully nine-tenths of all the minor ills of childhood have their root in indigestion. There is no medicine for the little ones to equal Baby's Own Tablets in relieving this trouble. They have proved of benefit to thousands of homes. Concerning Mrs. Mrs. Lunette, Immaculate Conception, Que., writes: "My baby was a great sufferer from indigestion, but the Tablets soon set her right and now I would not be without them." Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Yes, the moon and a woman's heart are constantly changing—but there's always a man in them.

Drives Asthma Before It. The smoke vapor from Dr. J. D. Kellogg's Asthma Remedy gives asthma no time to linger. Our experience with the relief-giving remedy shows how actual and positive is the success it gives. It is the result of long study and experiment and was not submitted to the public until its makers knew it would do its work well.

Too many men in the country vote as they pray—and they never pray unless it is to ask a personal favor.

Minard's Liniment 'Lumberman's Friend.

A Federal Research Bureau

Bill Providing For This Will Be Fathered by Sir George E. Foster

Provision for steps to be taken toward the equipment of a federal research institute on somewhat the same basis as the bureau of standards at Washington, will be made in a bill to be introduced in the house by George Foster, minister of trade and commerce.

The provision of a research bureau at or near Ottawa has been urged upon the government during the last two sessions by the honorary and advisory council for industrial and scientific research. It has been urged by the council and by the members of the special parliamentary committee on scientific research that the establishment of such a bureau here was absolutely necessary if Canada was to take her proper place in industrial and scientific development.

The proposals which were laid before the government called for an expenditure of about a half a million dollars for buildings and equipments, but it is understood that this estimate has been somewhat modified and that the initial outlay would not be more than \$200,000 for the first year.

For Irrigation Project.

The Calgary office of the Canada Land and Irrigation Company has received word from the office in London, England, that satisfactory arrangements have been made for financing the construction programme of the irrigation project in Southern Alberta, involving an expenditure of \$1,500,000.

The women of Egypt have cast aside their seclusion and are demanding freedom from imprisonment in the harem.

Ask for Minard's and take no other.

DRINKS FOR THE CHILD

BY LORETTA C. LYNCH

An Acknowledged Expert in All Matters Pertaining to Household Management.

A mother writes to say it is all very well for dieticians to tell mothers that their children must never have a drop of tea or coffee, but that children get tired of cocoa.

For a change, give them Cambric tea. Half a cup of milk is mixed with half a cup of boiling water. A little sugar is added and the youngster sips his tea along with the grown folks who are perhaps indulging in Orange Pekoe.

The cereal coffee on the market—and there are several varieties—are good for children and most acceptable to the palate if properly made. Read the directions carefully and then proceed to follow them accurately.

Sometimes a child will take hot malted milk when it is flavored with cereal coffee when it may refuse it if unflavored. Malted milk may be mixed with either hot water or scalded milk. It is good cold as well as hot. Cold malted milk is often accepted by a child if a generous spoonful of flavored ice cream is well mixed into it.

Hot lemonade for the hot meal at breakfast may be very properly given. It is so much better than tea or coffee. Squeeze half a lemon into a strainer set over a saucepan. Add one level tablespoon of sugar and one-half a measuring cup of water. Boil for one minute. Pour into a mug. Add a little cold water to cool for drinking.

Grape juice, either hot or cold, is suitable for children. A little grape juice added to a lemonade gives it a different turn.

Orangeade, also, is good for children.

Of course, children should learn to drink several glasses of water a day. Make the water hot if you must, but give the child water.

If you live where fresh pineapples are fairly cheap, you can enjoy a drink that will promote good digestion. Prepare a pineapple and crush the fruit into a bowl. Sprinkle lightly with sugar and let stand. Collect the juice and dilute it with hot or cold water. The drink may be made from canned pineapple, but it is not so valuable to digestion as when made from the fresh fruit.

Forage Crop Competitions.

Carrying out one of the recommendations of the Better Farming Commission, a series of co-operative experiments will be undertaken in Saskatchewan in the growing of crops for forage. These experiments will take the form of competitions.

ADVICE FOR BACKACHE

When stooping hurts, when lifting and bending causes distress, the time to rub in lots of "Nervine." Usually a couple of applications brings grateful relief. No iniment more certain to relieve corns to kill muscular, rheumatic, or sciatic pains. Thousands of homes rely on good Old Nervine for cramps, colic, dysentery and external muscular pains. Large 35 cent bottles for sale everywhere.

World's Highest Mountains

Andes Have Greatest Number of High Peaks.

The Himalayas contain the tallest mountains in the world, but it is in the Andes of South America that are to be found the greatest number of peaks over 20,000 feet in height. In Bolivia are the Cordilleras de la Paz, of which twelve peaks, altogether, tower more than four miles towards the sky. Farther north, in Ecuador, are twenty volcanoes in one cluster, all covered with perpetual snow. The lowest is just on 16,000 feet, the highest, Mount Chimborazo, is 20,498. Three of these volcanoes are still active, and eleven out of the twenty have never yet been climbed. The highest of the South American Andes is supposed to be Aconcagua, 29,330 feet. But the Andes, between the latitudes of Panama and Cape Horn, can show no fewer than 288 peaks, which are more than 10,000 feet in height, 138 over 18,000, seventy-nine over 19,000, and forty-two over 20,000 feet. The four biggest all exceed 23,000 feet. The Andes possess another record, in the shape of the highest road in the world. This is the famous Araya Road, in Peru, which pierces the mountains by the Guerrero Tunnel at a height of 15,654 feet. This is almost the same level as the topmost summit of Europe's highest mountain, Mont Blanc.

Russia is the only great gold producing country in Europe.

A Gruesome Paradise

Russia Dying Before the Eyes of a Helpless World.

After a little over three years of Soviet rule Russia lies dying before the eyes of a helpless world. What was to have been the triumph of Marxian Socialism has become a disaster, which has involved in mental and physical suffering many millions of human beings, besides sweeping away all the foundations upon which their prosperity rested. When Lenin, Trotsky and Chicherin seized the reins of power towards the close of 1917 they proclaimed a Communist Government with a Constitutional Assembly—which has never assembled from that day to this—in which the last word as well as the first word would lie with "the workers." At last the great masses of Russia, whether living in the towns or engaged in various agricultural pursuits in the countryside, were to come into their own. What has been the sequel?—London Daily Telegraph.

A Divorce Granted

After many years of patient suffering, you can be divorced from corns, you can get rid of them completely by applying Putnam's Corn Extractor. This wonderful oil remedy acts in 24 hours and never fails. Refuse a substitute and remember "Putnam's" is the only Painless remedy. 25c everywhere.

In English law there is no definition of an accident.

Minard's Liniment Co., Limited.

Sirs—I have used your MINARD'S LINIMENT for the past 25 years and whilst I have occasionally used other liniments I can truly say that I have never used any equal to yours.

I rubbed between the hands and inflamed frequently, it will never fail to relieve cold in the head in 24 hours. It is also the best for bruises, sprains, etc.

Yours truly, J. G. LESLIE.

Darlington.

Hawaii Using Volcanoes

Scientists Claim Volcanic Gases Have Limitless Possibilities.

The volcanoes of Hawaii, whether dead or alive, are working for, or are going to be made to work for the people. Honolulu has just tapped the extinct crater of Palolo, overlooking the city, and is getting therefrom 2,000,000 gallons of drinking water daily. Hilo, on the island of Hawaii, is raising a fund to tap the active volcano Kilauea and utilize the tremendous volume of gases there for industrial and other purposes. Scientists say that pentup volcanic gases have limitless possibilities from an industrial and power standpoint, while they also contain all the food elements necessary to sustain the human body—carbon, nitrogen, hydrogen and lime.

Farm Products of B.C.

The British Columbia minister of agriculture, Hon. E. B. Barrow, announces that the value of the farm products of the Pacific province last year exceeded sixty-eight million dollars. The minister adds that not more than 15 per cent. of the area capable of cultivation is occupied.

Automobiles cost as much as \$100,000 each in Russia.

TROUBLED WITH ITCHY ECZEMA

In Rash On Face And Limbs.

Cuticura Heals.

"I had been troubled with eczema on my face which took the form of a rash. Later it broke out on my limbs and they itched very much, causing me to scratch them until they were bleeding. The rash would often keep me awake at night. "I tried some remedies, which failed, and then thought I would try Cuticura Soap and Ointment. It was not long till the rash began to disappear, and I used three cakes of Soap and four boxes of Ointment, which healed me." (Signed) W. M. Myers, Paris, Ont., Sept. 12, 1919.

Cuticura Soap to cleanse, Cuticura Ointment to soothe and heal. Soap 25c, Ointment 25c and 50c. Sold throughout the Dominion. Canadian Depot: J. Ross, Limited, St. Paul St., Montreal. Get Cuticura Soap above without tag.

Bauky Horses

What to Do and What Not to Do to Prevent and Overcome Trouble.

It is doubtful if any horse is a born baulker, that vice generally being acquired through mismanagement when young. It is no exaggeration to say that numberless even tempered horses have been absolutely spoiled by overloading and over-driving before the muscles of the shoulders are seasoned to the pressure of the collar. Young animals should never be expected to pull a load when first broken. The task should be gradually increased as the horse becomes accustomed to work, and gains confidence as his shoulders harden. In all cases a man must be watchful, and see that his horse, especially if young, is not getting winded or showing signs of over-fatigue by breaking out suddenly into a heavy sweat. Before he stops of his own accord, pull him up with a sharp "whoa," lift the collar, and let his shoulders cool for a minute or two; do something to the harness while he gets his wind. By doing this the animal goes freely again, and is not cowed. If the shoulders are over-heated and tender, and he is out of wind, violent means to make him go render him frightened, then ob stinate, and thus a baulker is made.

USE SLOAN'S TO WARD OFF PAIN

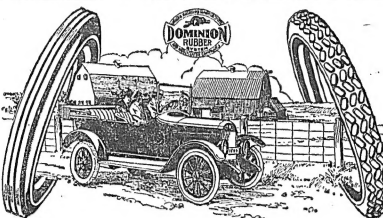

You can just tell by its healthy, stimulating odor that it is going to do you good.

"If I only had some Sloan's Liniment!" How often you've said that! And then when the rheumatic twinges, aching joints, or aches of suffering—you forget it!

Don't do it again—get a bottle of Sloan's Liniment handy for possible use tonight! A sudden attack may come on—sciatica, lumbago, sore muscles, backache, stiff joints, neuralgia, the pains and aches resulting from exposure. You'll soon find warmth and relief in Sloan's, the liniment that penetrates without rubbing. Clean, economical. Three sizes—35c, 70c, \$1.40

(Made in Canada)

Sloan's Liniment (Pain's enemy)

The Right Tires, to suit your car and the roads you travel

If your car is a Ford or Chevrolet, Gray-Dart or Overland, the DOMINION "Grooved" or "Nobby" Tread give you nonskid, non-side-slip Tires of consistent quality and proven mileage. Or—you may find that DOMINION "Chain", "Grooved" or "Nobby" Tread on the rear wheels and DOMINION "Plain" Tread on the front, are the ideal combination for comfort and mileage.

If you drive a heavier car like the Studebaker, McLaughlin, or Packard, you will have the utmost satisfaction with DOMINION "Royal Cord" or "Nobby" Treads—the supreme achievements in tire building.

The best dealers throughout Canada have DOMINION TIRES, DOMINION INNER TUBES and DOMINION TIRE ACCESSORIES.

DOMINION TIRES ARE GOOD TIRES

A Better Table Drink

INSTANT POSTUM

Made instantly in the cup by adding hot water—no delay and no waste. Delightful and satisfying in flavor, with none of the harm that sometimes comes from tea or coffee.

Clean-Up!

We are pleased to notice that nearly everyone is busy these days cleaning up their premises. Cleanliness is inexpensive, and a little effort on the part of every citizen will work wonders. A clean home and store should be every citizen's ambition and pride; they are marks of good citizenship.

When clean up week is past, let every day be clean up and keep the home, the store and our town clean and sanitary.

A nice young lady walked into a music store and said to the clerk: "Have you 'Kissed Me by Moonlight'?" The clerk looked puzzled, and then he said, "It might have been the man at the next counter, Miss, I've only been here three weeks."

Appollo is said to be the first gentlemen who ever struck a lyre. If he had only hit him a little harder we might not have had so many magnificent liars at the present time.

Loans aggregating to \$80,302 649 have been made to 19,931 soldiers in the Dominion. Courses in agriculture have been completed by 1,500 prospective veterans settlers, and 916 men are still in training.

Don't allow flies in your house.
Don't permit them near your food, especially milk.
Don't buy foodstuffs where flies are tolerated.
Don't eat where flies have access to food.
Don't forget to put in your screens early.

The Right Hon. W. F. Massey, Premier of New Zealand, will pass through Canada en route to London, England, to attend the Imperial Conference. He will be accompanied by Mrs. Massey, his daughter and secretary. The party left Auckland via S. S. Niagara on April 16, and on arrival at Vancouver will travel across Canada via Canadian National Railways.

In Manitoba, Saskatchewan and Alberta it is estimated that there is a total of 42,785,750 acres ready for cropping, compared with 11,649,744 last spring.

Better Roads

There are many striking examples of the value of good roads. Wherever roads have been permanently improved it is found that there has been a very great increase in value of the adjacent property.

Now that Spring is here it is time to begin to plan for better roads in the district.

The municipality of Sounding Creek is arranging to do considerable road work this year, and are asking the Department of Public Works for a grant for that purpose.

SPROUTING

Sykes in Philadelphia Ledger.

First Semi-Monthly Crop and Live Stock Report

Reaching a conclusion from a comparison of this year's spring operations with the operations of last year seeding is not late.

Earlier Than Last Year

The spring has opened in good time and it has been possible to make a start in cultivation in practically every quarter of the province, but the warming up process, on the other hand, has been slow. Nights continue cool and the grass has not made any great progress except in the south. In spite of slow weather experienced farmers are favorable to making the best use of their time for wheat seeding once the soil is fit to work. It is considered an advantage to have a slow rooting of the wheat crop. The favorable condition of the land for cultivation is perhaps due to the disappearance in midwinter of a good deal of the snow fall of December. There is not in any part of the province a condition of heavy saturation of the land from fast melting of snow.

Southern Alberta

In Southern Alberta conditions are rather better than usual, particularly in those parts of the province where the moisture disappears most easily. Seeding operations are active at Medicine Hat. Farmers report that there is more moisture in the ground this year than there has been in the past three or four years. It is expected that seeding will be completed here by May 15th, though only about ten per cent. of the crop is sown so far. In the Lethbridge country conditions are good. Fifteen to twenty per cent. of the wheat has been already sown. A snow fall of eight inches, reaching from Nanton and covering the whole south-western part of the province occurred on Saturday the 23rd, which in itself is adequate to freshen the soil down to plow depth and to give a quick start to the grain. In the district east of Calgary seeding operations have been active. Sixty per cent. of the wheat seeding will be finished before the end of the month. Seeding conditions have been made good by recent storms in this district also, though some of the stubble land is quite dry.

Central Alberta

In the Red Deer and Lacombe country the snow lingered and operations have not been as early as usual. The Edmonton district seems to be rather farther ahead than usual. Work has been going on steadily for three weeks in the Clover Bar, Rabbit Hill, Stony Plain and Fort Saskatchewan districts. The conditions for germination are favorable. At Lloydminster the unsettled condition of weather has delayed the seeding, but a good moisture supply on these open lands will insure a good crop.

Peace River

The people of the Peace River

are vigorously at work and wheat seeding will be about as far along at the end of the month as it is in Central Alberta. The season appears to be rather earlier in the Grande Prairie, Spirit River, Beaver Lodge and Waterhole districts than farther east. Cultivation work has been going on around Peace River itself, but seeding is not yet general. It is expected that seeding will make rapid progress at the first of the month.

It is not possible yet to estimate how the total area of the province will compare with that of last year. The normal increase is about eight or ten per cent. per year, but this rate was increased during four years of the war. The feeling of the farmer is not favorable to any increase, and in some places there will be a slight shrinkage, but the demand for labor is keen at Edmonton, Calgary and Lethbridge. There will probably be some shrinkage due to an increase in summer-fallow.

Live Stock

Live stock has come through the winter in good condition in all parts of the province. It is safe to say in the first three months of winter stock did not consume half the feed that it did in the winter of 1919-20, and much less in the second half also than it consumed last year. Grass is growing well in the south country, but is coming rather slowly in both Central and Northern Alberta.

JAMES CRAIG,
Crop Statistician.

MADE IN HAMILTON TRAIN

The Hamilton, Ont., Chamber of Commerce have planned to run a special "Made in Hamilton" train, from Hamilton to Vancouver. The trip will doubtless give Hamilton manufacturers an unusual opportunity to get in close touch with the business men of Western Canada. Representatives of the Hamilton Board of Trade will be in charge. The train will leave Hamilton on Friday, June 3rd, making brief stops at many local points and longer stays at large centres. They are scheduled to arrive in Vancouver 8 a.m. Tuesday, June 14, leaving again at midnight same day for return. The train will consist of nine cars and doubtless will attract wide spread interest. On the return trip via Canadian National Railways, the schedule of the special train between Vancouver will be as follows:

Lv. Vancouver 11 a.m.	Friday, June 17
Ar. Robson 8 a.m.	Saturday, June 18
Lv. Robson 9 a.m.	" " 18
Ar. Jasper 11 a.m.	" " 18
Lv. Jasper 6 p.m.	Sunday, " 19
Ar. Edmonton 7 a.m.	Monday " 20
Lv. Edmonton 12 midnt	" 20
Ar. Saskatoon 8.30 a.m.	Tues. " 21
Lv. Saskatoon 2 p.m.	" 21
Ar. Melville 9 p.m.	" 21
Lv. Melville 2.15 p.m.	" 21
Ar. Winnipeg 4 a.m.	Wed. " 22

Money Will Not Buy A Better Paper

THE man of wealth can buy a better car, wear better clothes, eat better food, live in a better house, than those without means. BUT HE CANNOT BUY A BETTER NEWSPAPER. Even if he would spend \$50.00, \$100.00 or \$1,000.00 a day... if he lived in the territory covered by The Calgary Herald, he could not buy a paper that would serve his needs better than you can for 2-2-3c a day.

In Buying Newspapers All Men Are Equal

THE price of newspapers is the same, or nearly so, regardless of the value they offer—so you see that you get the best value on the best costs no more. In the Calgary Herald you get a paper that averages from 18 to 36 pages,—you get all the news first, and its dependable. You get a variety and a wealth of special articles, departments and features that are equalled by but few papers in the Dominion. The Herald offers the greatest newspaper value you can buy—and, as for the past 37 years, it will serve you best.

Money Cannot buy Better YOU SHOULD READ—

The Calgary Daily Herald

Alberta's Greatest Newspaper

Order from your Local Agent or direct from the Publishers at Calgary.

RED CROSS

In Peace or in War—The one Universal Emblem of Sacred Motherhood, watching over Mankind. - Counting neither cost nor Sacrifice. Measuring only Service and Devotion.

IN time of peace, all over civilization, the Red Cross, drawn by great need, has consecrated itself to the task of active, vigilant, comprehensive service to these high ideals:

THE IMPROVEMENT OF HEALTH.
THE PREVENTION OF DISEASE.
THE MITIGATION OF SUFFERING THROUGHOUT THE WORLD.

In the Province of Alberta, the Red Cross has undertaken broad and effective programmes that will not only lead to these ends, but will in their progress and accomplishment make our communities better places to live in, brighten our lives, improve our material welfare, and help weld all the people of our prairies into a brotherhood of common sympathies. And so also in all the other Provinces of our Dominion, and in every land and clime that knows the crimson badge of mercy.

UNIVERSAL MEMBERSHIP ENROLMENT

Western Canada Dates, June 5-11

Red Cross is not asking that you pour gifts of money into her lap at this time—excepting only a nominal membership fee of One Dollar; but it proposes to lay before the citizens of the west its programme and its peace policies, point out the need for its helping hand, and ask every man, woman, and child during that week to subscribe to its creed, enlist in its ranks; to join the Red Cross, enroll his or her name, and become a member of the Society.

And this is also a call to every citizen who can and will, to give their service to the organization, to assist in the work of personally extending to every individual the opportunity and privilege of this membership. Organizers from Alberta Red Cross Headquarters are now engaged in visiting every district in the Province. You are invited and urged to identify yourself with the Campaign Committee in your locality, and give the campaign your co-operation and service.

O'Sullivan Block, CALGARY

Western Canada Is Attracting Great Numbers Of Settlers From U. S.

Nearly fifty thousand emigrants came from the United States to Canada in the year 1920 to make permanent homes in the Dominion. Practically all of these, it is estimated, were experienced agriculturists who either secured free government homesteads or purchased improved farms. Whilst this very desirable contribution to Canada's man power, deposited in the manner to best serve Canada's need, is only about one-third of that of the years prior to the war, it is estimated authoritatively that the Dominion received last year, and during the war years, as many farmers from the United States as she was wont to welcome, and that the classes whose emigration fell off due to war conditions were the industrial, the speculative and others not directly producers. It must also be borne in mind that would-be entrants at the border are sifted as carefully as at ocean ports, and that in the existing internal conditions, in some months as many applicants at border towns were rejected for Canadian citizenship as were accepted.

Gratifying as was 1920's emigration of farmers from the United States, greater attention was drawn in that year to the anxiety of the 1921 exodus as evidenced in the more general interest taken in Canadian lands and agricultural affairs, the harvest of which will be reaped this year and years to come. Whilst large numbers of farmers came to settle with their families on western farm lands, there was an infinitely greater number of scouts who, for themselves or others, came to look over the situation, judge as to locality, pick out the land, and perhaps purchase, and then return to their homes to clear up their affairs before making the final move and settling in the newly chosen homes.

During the summer, under the auspices of the Dominion Government, special trains carrying American editors and business men toured the Canadian West, the trips being many a revelation. They were surprised and delighted. They became boosters for the country. Many could not withstand investing in the assured future of the country. The consensus of opinion among these men, all representative of thickly settled agricultural districts and in close touch with the economic conditions pertaining to them, was that more than ten thousand Americans would settle in Western Canada during the present year. A great wave of immigration, they felt, was inevitable, and this the first tide of the early spring would seem to justify.

American farmers came up to Canada when it is borne upon them that as fine crops are being raised upon the low-priced lands of Canada as upon their own highly held holdings. They see Canadian farmers carrying off the world's premier honors in wheat and oats and successfully competing in corn against the recognized corn belt. They want to expand and secure large holdings for themselves or growing families of boys, a development impracticable in their own localities.

The prevailing exchange situation has been decidedly advantageous to United States farmers purchasing in Canada, and instances have come to light where the entire proceeds of acquiring a new Canadian farm has been transacted on the difference in the exchange of money, the farmer, at the conclusion of the deal, being in possession of land of possibly greater acreage and the sum of money for which he sold his United States property intact.

Many American purchasers of improved farms have discovered a gratifying feature in the high productivity of cheap Canadian land in the fact that a farm may pay for itself in a single year, returning from the proceeds of the first harvest a revenue in excess of the purchase price of the farm.

United States farmers are being attracted to Canadian farms in increasing numbers yearly, and even the upland, which the war brought about did not interfere with this category of the United States exodus. In the first seven months of 1920, nearly 7,000 United States farmers took free government homesteads in the Western Canadian provinces, whilst thousands of others purchased cheap, privately held lands or improved farms. Canada's magnificent crop and her numerous international agricultural successes are going to attract more this year, whilst a sure forecast of what Western Canada has to expect from across the border this year and

for years to come, is contained in the tremendous interest exhibited by United States farmers and others throughout the whole of last year.

Electric Method To Increase Grain Yield

Southern Alberta Farmers Adopt New Method of Treating Seed Grain

Seed treated by a new process of seed electrification, a method which, it is claimed, will increase the yield, check the spread of fungal diseases and improve the quality, will be sown this year by many of the leading farmers in Southern Alberta. A plant for the treating of seed has been established and already its capacity is taxed to such an extent that an enlargement will be made immediately.

Great claims are made as to the advantages of this system which is known as the Walleye Electro-Chemical process of seed-electrification. The process consists in placing the seed to be treated in a bath containing a suitable metallic salt such as calcium or sodium chloride and weakly electrifying the same for a length of time appropriate to the seed under treatment. The solution is then run off, and the seed taken out and dried. The object of the salt is not only to decrease the resistance, or, in other words, to increase the conductivity of the seed coat, but to maintain that conductivity during the period of germination. Calcium and sodium in correct proportions are, however, plant foods and assist in the after stimulation of root production.

This method is a new one to Canada, but it has been tried with remarkable success in England.

Advocate Widening Saskatchewan River

At An Estimated Cost of Twenty Millions River Could Be Made Navigable

Hon. J. L. Coe, provincial secretary and minister of mines for Alberta, read a statement in the Ottawa House regarding the coal situation in the province. The key to the marketing situation, he said, was the widening of the Saskatchewan River. The public works department had made a survey of this project and it was estimated by spending \$20,000,000 a channel six feet by 150 feet could be effected between Edmonton and Winnipeg. The reduction in freight would be from the present six mills per ton mile to 1-1/2 mills.

Checking the water in the mouth of the river would be contingent to the scheme and power could be generated, thus lessening the cost.

War Responsible For Eye Surgery

Study Began After Advice of French Eye Expert

Little was known concerning the surgery of the eye in Great Britain until the expedition into Egypt under Sir Ralph Abernethy took place following the advance of the French into the land of the pyramids led by Napoleon Bonaparte. The British troops, says the New York "Medical Journal," became the victims of contagious ophthalmia, which was then widely prevalent in that country, and brought back that scourge into Great Britain. Incapacitated from further fulfilling their military duties, the disease was spread by these men throughout the length and breadth of the land. Serious study of the eye then began.

Timber of Nova Scotia

The timber tract of Nova Scotia still continue to be one of the biggest revenue producers for the province. In 1920, the total cut was about 350,000,000 feet, possessing a value as raw material of \$12,500,000. But this by no means covers the full value to the province and from the best sources of information obtainable it is estimated that the value of timber products during the past year was in the neighborhood of \$23,810,000.

Alberta Farmers Import Dairy Stock

A movement is on foot in the neighborhood of Coldlake, the centre of the Prairie region, to bring from 60 to 80 cows from Ontario by an association of farmers and entering into the selling of milk locally as well as the manufacture of butter.

Prairie Red Cross Programs Advanced

Peace Time Campaign Is Now Well Under Way in the West

Western Canada has taken up the peace time program of the League of Red Cross Societies, which operates under the sanction of the League of Nations, with enthusiasm. A Western Canadian, R. B. Bennett, Calgary, president of the Alberta Red Cross Society, is now representing Canada at a conference of the League being held in Geneva.

Peace time programs of the Alberta, Saskatchewan and Manitoba already are well advanced. The Alberta Society probably has made the most progress in this respect of any political division of the British Empire. In that province, district hospitals have been organized, health stations have been sent to remote and newly settled districts, including those of the Peace River area, which is being rapidly filled with farmers under the soldiers settlement scheme. The Junior Red Cross Societies have been organized in hundreds of schools and have a membership of tens of thousands of children. The League of Red Cross Societies at Geneva recently circulated a bulletin throughout all Red Cross organizations affiliated with the League of Nations giving a detailed report of the plan being carried out in the province, from the pen of Mrs. C. B. Waagen, general secretary of the Provincial Red Cross.

In Manitoba too the Red Cross has retained intact a remarkably vigorous organization which grew out of its tremendous activities during the war. It is particularly noticeable that war work is still being carried on vigorously in Manitoba, especially in Winnipeg, a great centre of military activity, for here are located great military hospitals in which there are many disabled and helpless returned men.

The most outstanding work in Manitoba in connection with the peace time program of the Red Cross is the inception of a plan of public health nursing. Much good work of a similar nature also has been accomplished in Saskatchewan.

It is now obvious that, to carry out the peace time program on a permanent basis, the membership of the societies must be definitely organized in conformity with the call made at the Red Cross Societies' convention at Geneva last year. In many countries this membership campaign already is under way. Indeed in the United States this has been done systematically since the war, the annual roll call in the autumn of each year maintaining a regular membership in excess of 7,000,000 persons, excluding an even greater number of children. The only other country in which membership enrollment has been carried out is Czechoslovakia, a war-torn land in which the residents do not have to be told of the beneficent work done by the organization. About one-fourth of the entire population of the territory has been enrolled.

That Canadian will not overlook their opportunity of supporting the "Croix Rouge" during the membership campaign from June 5 to 11 next is regarded as a certainty by officials in charge of the campaign, who point out that there was no more generous response to the demands of the organization during the trying years of the world-war than that given by Canadians.

Aged 102; Loves Flying

Mansfield Woman Starts Second Cen- tury Flight Tomorrow

After her ninth aerial trip the other day Mrs. Ann Sissons, of Mansfield, England, 102 years old, went out and got herself baptized and confirmed by the Bishop of Sheffield at Pimoor. She made her first flight after her hundredth birthday and says she loves the game and is going to play it the rest of her life.

"Why not?" she said. "I started my second hundred in better condition than I started my first, for I could walk at the beginning of my second hundred, so I thought I might as well learn to fly as I had learned to walk."

The Settlers In March

During March of this year 1,801 settlers from the United States arrived in Canada via the ports in the western district, 897 of these were farmers and farm laborers—776 were women and children; 128 various occupations. 56 went to Ontario, 208 to Manitoba, 709 to Saskatchewan, 786 to Alberta, and 42 to British Columbia. They brought with them money to the amount of \$64,895, and effects valued at \$308,891.

Among after-the-war bargains offered by the British Government are 17 airplane stations, 9,000 habs, and 5,010 tons of chicken broth.

Motive Power Expert

R. A. Pyne, Superintendent of Motive Power and Car Department, Canadian Pacific Railway Western Lines.

"Sprouting" Potatoes Adds To Yield

Given Start Before Planting Tubers Will Develop More Quickly

By "sprouting" potatoes it is possible to add eighty-eight bushels per acre to the yield, this result having been obtained with Irish Cobblers last year. Sprouting is a common practice in Ireland, and consists of medium sized tubers selected before they have sprouted to any extent in the cellar, and either placed in shallow boxes or trays, preferably with the seed end up, or spread shallow on the floor of a room where there is a bright light. Either method will give almost equally good results. At first the temperature should be cool enough to prevent sprouting. The skin will soon turn green and become rather tough. The temperature is now raised enough for the tubers to sprout, and when treated as described two or three strong sprouts will develop from the seed end, the other eyes remaining dormant. Growth will thus be concentrated in these few shoots and, as a rule, there will be a larger proportion of marketable potatoes where there are a few good shoots than where there are many. If the potatoes are given plenty of light and the place where they are kept is fairly cool, the sprouts will become very sturdy, and strongly attached to the tuber, will be green in color, and will not be broken off by handling unless very carelessly used. Thus given a start before planting, they will usually come along rapidly and tubers will develop more quickly from sprouts which have grown slowly in a bright cool place than from sprouts which have grown in a dark place, the latter, moreover, usually breaking off at the time of planting. Sprouts should be about two inches in length at the time of planting.

The warmest and best drained soil is available should be used for extra early potatoes, says Dr. W. T. Macoun, Dominion Horticulturist, and the sets should be planted shallower than for the main crop so that they will get the advantage of the heat from the surface soil. In Great Britain the potatoes are planted whole when sprouted, growth being more vigorous when this method is followed, but this is not necessary in order to get an increase in yield. It has been found that, taking one year with another, the earlier potatoes are planted in most places in Canada after the ground is dry enough to work and danger of very severe frosts are over, the larger the crops will be.

The following is given as a general rule of guidance for planting potatoes in Canada for highest yields. Where the spring is early and autumn frosts early, plant early; where the spring is early and the summers dry, plant early; where the spring is late and autumn frosts late, early planting is not so important; where the spring is late and the autumn frosts are early, plant as soon as soil is dry enough.

Valuable Discovery at Penitence

A large body of strematium is reported to have been discovered near Penitence, B.C., assaying about 70 to 75 per cent. This is a commodity used in the refining of sugar, and refiners have recently been endeavoring to secure supplies from Austria.

In Order To Maintain Freedom of the World All Must Stand Together

No Danger From Comets

Even If One Struck the Earth It Would Not Harm Us

From time to time the columns of the newspapers are enlivened with reports that the earth is in imminent danger of collision with a comet. Alarming rumors of this sort, it will be recalled, attended the last visit of Halley's comet, and now it is the Pons-Winnecke comet that is about to annihilate us.

Sensational announcements on this subject having been erroneously credited in the press to Greenwich Observatory, Dr. A. D. C. Crommelin of that institution takes occasion to deny them in the Journal of the British Astronomical Association.

As to the chances of collision between the nucleus of the comet and the earth, he says that the uncertainty of the comet's distance from the sun at nodal passage is quite one-half million miles; the chance is, therefore, one in sixty that it falls within a particular eight thousand miles (the earth's diameter). Next, the comet's resolved velocity perpendicular to the ecliptic is about eight miles per second, which would mean one-third hour for eight thousand miles. Now, as the possible range of perilous passage is some four hundred-hours, the combined chance of collision with the head is one in 60x1200, or say one in 70,000. If we assume for the comet a diameter of 100 miles, the earth, we should multiply the chance by 16 but it should still be only one in 4,000. Collision with the coma, says Dr. Crommelin, would probably almost escape notice, while even if the head were encountered there is no reason to anticipate anything more than a great meteor shower.

Clove Trees

Grow Very Tall and Saturate Air With Perfume

Ninety per cent. of the world's supply of cloves comes from two tiny islands off the coast of Africa—Zanzibar and Pemba. Native of the tropics, the clove takes unto itself some of the intense heat of the broiling sun. To pass through a clove plantation in the harvest is to experience one of the most fascinating sights on earth. The high trees—some of them nearly forty feet, and closely resembling the olive tree in appearance—are suggestive of giant perfume bottles, disguised in leaves. The air is saturated with the delicious scent and for many days afterward your clothes carry the seductive aroma.

Sun Spots

Spotted Parts Have Lower Tempera- ture Than Bright Area

If the latest theory in regard to sun spots, i.e., that they are a sign of the commencing debility of the dwarfed and shrunken star which we call the sun is correct, they will become more frequent and larger as ages pass, until at length our much admired orb of day is darkened and ceases to be a worthwhile source of heat. Astronomers and meteorologists are much interested in sun spots, and keep a constant watch on them. During the last few months they have been remarkably few and small. It seems to have been proved that spotted areas of the sun have a lower temperature than the bright spots. Hence it is inferred that quite possibly the recent relative absence of sun spots may be accountable for the remarkably warm winter we have been enjoying.

Deal With Forest Fires

Six Aeroplanes Will Be Used In Southern Alberta

Elaborate measures are being taken this year by the Dominion Forestry Branch to deal with outbreaks of fire in the forest reserves of Western Canada. Six aeroplanes will be used in Southern Alberta, two main flights being made daily in ordinary weather, one north and the other south. Extra staff and equipment will be in readiness for more frequent flights when there is fire danger. It is thought by this system to greatly minimize danger of fires in the reserves, which yearly serve as grazing grounds for thousands of head of cattle and sheep.

As an aid to loveliness, Hindu women color their teeth black, while in Japan and China they paint their faces white with red on their cheeks and magenta on the lips.

Sir Auckland Geddes, British ambassador at Washington, was the principal speaker at the annual dinner of St. George's Society of New York at the Waldorf Astoria. Five hundred members and guests attended, women and men dining together for the first time in the history of the society.

Sir Auckland, who was received with great applause, remarked that while St. George's Societies were dining in celebration of the day in Canada, Australia, India and other parts of the world, no dinners were being held in England because of the labor troubles.

"England is only one-fifth as large as Texas, small and not particularly fertile," he said, "but rich in men and women. That is the treasure of it." The labor troubles in England, the ambassador said, were only another form of the old fight that was fought in England for democratic government. The trouble was part of the cost of the war which had disarranged the economic machinery of Europe, but the difficulties would be overcome.

Speaking of those who are trying to break the ties of friendship and understanding which exist between the allies and associated nations which fought together in the war, Sir Auckland said they were striving to drive a wedge between the nations and make hostility take the place of friendship, endeavoring to drop the seeds of suspicion in each country, whispering to simple people and trying to arouse distrust.

"It is," he declared, "the work of broken and defeated men who have nothing to lose and all to gain. Cooperation between the allied and associated powers must be insisted upon and kept prominently in the minds of men, for these stand against militarism and stand for freedom and democratic rule. These are things that matter."

"I know of no question which is not easy of solution by half a dozen sensible men gathered about a table."

"These rumors and whisperings are all part of a game to trouble the waters that these defeated men may go fishing. It is vital that all interested in maintaining freedom in the world stand together and oppose these base suspicions which are intended to make us feel less friendly towards each other."

Germans Trying To Secure Spanish Market

Quoting Prices Far Below Those Of Other Countries

George White, an American, writing from Barcelona to the Daily Mail, says the Germans are making "a drive to secure the Spanish market in practically every line of industry," and says they are quoting prices irrespective of value in order to capture the market.

The writer gives several instances of the prices quoted by the Germans as compared with those quoted by firms of other countries. He cites the case where a big American firm offered a cement mill for New York for \$100,000; the Germans bid on practically the same machine for Hamburg for \$20,000 less.

The Germans, he says, are quoting cement delivered in any port in Spain at 100 pesetas, which is about 20 pesetas below the standard price Spanish manufacturers ask. Tramway tickets they are offering at less than half the sum any of the local people can print them for and they guarantee delivery in four weeks as against three months.

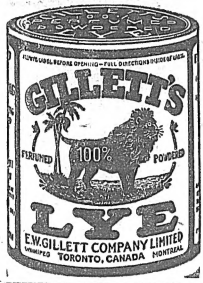

The writer concludes that if the Germans continue their present programme they are "going to drive many of the Spanish manufacturers to the wall."

Work on Alberta and G. W. Railway

Already 202,000 ties have been distributed along the Albert & Great Waterways Railways in readiness for spring construction, while a total of 300,000 has been cut and will soon be in place, according to officials of the company. Men are now engaged in laying the ties where needed, and as soon as the frost goes out of the ground great activity will prevail.

Well Raised

A negro mammy had a family of well-behaved boys, and one day her mistress asked, "Sally, how did you raise your boys so well?" "Ah! tell you, missus," answered Sally. "Ah raise 'em boys with a barrel stave, an' Ah raise 'em frequently."—Watchman-Examiner.

World Happenings Briefly Told

Ford Motor Co. has started recall of single workers without dependents to its automobile plant at Detroit.

Final figures of the referendum commission put Toronto on the west side by a majority of 9,010.

A Cincinnati woman left the bulk of her estate to the U.S. Government to help pay off the war debt.

A Detroit judge permitted a prisoner to leave court to attend a funeral. He hasn't got back yet.

Welland, Ont., fears loss of early cherries by the recent severe cold weather.

In five years Chicago has had 1,144 murders, New York 1,121 and London, England 128.

Among the items approved by the Ontario Legislature is one of \$100,000 for establishing a provincial cement plant.

From 40,000 to 50,000 men will be required to gather the 1921 crop in Kansas, it was estimated at a meeting of heads of employment agencies.

Provision for protection of the Holy Sepulcher against fire has been made by Sir Herbert Samuel, high commissioner for Palestine, says the Palestine weekly.

C. A. Birkett, of Fort William, was appointed secretary of the Grain Inquiry Board at an informal meeting of members. He has arrived in Winnipeg.

Four men were fined \$200 and costs or thirty days in jail, and three others were remanded on charges of disorderly conduct arising out of the unemployed demonstration in Toronto.

Sir Edgar Walton, the high commissioner for South Africa, in an interview with the London Times, says General Smuts' government has got well into the saddle and already had done much to unite the people.

Ouangwale, the Eskimo murderer, who, to secure a wife, killed two of his fellow tribesmen, has escaped from the Mounted Police at Chesterfield Inlet, and is now at large in the Arctic region.

Keeps Baby's Skin Healthy

If every mother could only realize the danger which lurks in the neglect of chafing and skin irritations she would not take chances on being without Dr. Chase's Ointment to apply after baby's bath.

It arrests the development of eczema and makes the skin soft, smooth and velvety.

Write a box, all dealers, or Edman, Bates & Co., Ltd., Toronto.

Dr. Chase's Ointment

W. N. U. 1366

Watering Farm Horses

Working Horses Are Frequently Neglected, Which Leads to Serious Results.

Water Moore, a well-known writer, says:—"It is a common thing for farmers to work their horses in the hay field from morning to night, watering them only at noon. This is done even on days of excessive heat. The driver usually has two or more refreshing drinks in the middle of the morning and again in the afternoon, but the horses, who are equally as thirsty, go without. This want of water is not only excessive, but it causes the horses to drink to excess at noon, and again at night, which often results in colic, and always tends to produce a distended stomach of what farmers call a 'hay belly.' Farmers who would treat their horses humanely should take water into the field for them in hot weather."—Boston Work Horse Relief Association.

THE FATEFUL YEARS FOR EVERY WOMAN

How to Overcome Troubles That Afflict Women Only.

So far as a woman's health is concerned, probably the most fateful years in her life are those between 45 and 50. Many women enter this period under depressing conditions, through overstrain in household cares, or a neglected condition of the blood, and so they suffer heavily.

Amongst the commonest symptoms in the back and sides, fever flutters, palpitation, dizziness and depression. It is well to know that these variations of health can be relieved by home treatment. What women stand in need of all their life, but never more so than in middle age, is rich, red blood. As a tonic for the blood and nerves, Dr. Williams' Pink Pills are always useful, but especially will they help women at this time.

Among those who have found benefit from Dr. Williams' Pink Pills is Mrs. J. A. McDougall, Rhodena, N.S., who says: "I was greatly troubled with nervousness, palpitation of the heart, dizziness, and a generally run down condition. It was only with difficulty that I could do my work, and although I had been taking medicine for some time I did not improve. Finally a friend advised Dr. Williams' Pink Pills, and I got a supply and began taking them. The result more than met my expectations, and I am feeling better than I have done for years. I sleep well, eat well, and do my household work much more easily. In my case the pills certainly did what you claim for them."

Dr. Williams' Pink Pills are sold by all dealers in medicine, or you can get them by mail at 50c a box or six fit through the use of Dr. Williams' Medicine Co., Brockville, Ont.

London maintains a laundry school, where girls are taught the true art of washing clothes.

Minard's Liniment used by Physicians

Poland Claims to Have the Oldest Maid in Central Europe.

Poland claims the oldest spinster in Central Europe. She is Miss Anna Dobek, living in Chocelohow, who recently celebrated her 123rd birthday. Miss Dobek is still quite active, physically and mentally, and does some household work each day.

She also has a sense of humor, and to her acquaintances, attributes her longevity to the fact that she has never been bothered by having a man about the house. Miss Dobek doesn't like cats, either.

Every careful and observant mother knows when her child suffers from worms. She also knows that if some remedy be not speedily applied much harm will result to the infant. An excellent preparation for this purpose is Miller's Worm Powders. They drive worms from the system and set up stimulating and soothing effects, so that the child's progress thereafter is painless and satisfying.

Lignite Coal in Western Canada.

The coal produced at the Lignite Utilization plant at Bismarck, Sask., will be placed on the Winnipeg market at \$11.50 per ton, according to a statement made recently in the Manitoba Legislative by Hon. T. H. Johnston, attorney-general. If all that is claimed for the briquettes manufactured at the Bismarck plant is correct, the price above quoted should revolutionize the coal trade of Winnipeg.

Direct wireless communication between England and Australia has been successfully effected on the Marconi principle. The distance covered is between 12,000 and 13,000 miles.

The outside walls of many of the houses in Mexico are from three feet to six feet thick to withstand earthquake shocks.

Keep Minard's Liniment in the house.

Creeps Into the System Just Like a Serpent

Like a thief in the night, it steals through the system—that's how Catarrh acts. Don't trifle with such a scourge. Time and experience have proved that Catarrh is a wonderful remedy for all Catarrhal and bronchial troubles. You don't take any drugs, you just inhale the sweet soothing vapor of Catarrh which is laden with balsamic essences that heal, relieve and ease the sufferer. To strengthen the throat, to sweeten the breath, to stop nasty discharges, to drive out Catarrh, colds and weakness in the throat, use Catarrh. Two months treatment one dollar, smaller size 50c, all dealers—or the Catarrh Co., Montreal.

To Begin Irrigation Work

To Bring Water to 100,000 Acres in the Lethbridge District.

It is now assured that construction on additional irrigation works to bring water to 100,000 acres in the Lethbridge Northern Irrigation district, will be started on the 1st May. The Legislature of Alberta now in session has unanimously decided to guarantee the necessary finances. The large farming area already under irrigation around Lethbridge has been very profitable. Bonds covering expenditure for the new irrigation area guaranteed by the province of Alberta will shortly be on the market.

The Dumb Animals

Movement For Greater Kindness to Dumb Animals Is Growing.

The movement to set aside special days for greater kindness to dumb animals is growing. It is a movement that appeals to reason.

Go back into childhood and almost anyone recalls a certain pet dog that was as loyal a friend as one could have. What child did not worship the intelligent old horse in grand-father's barn? Who did not have difficulty keeping back the tears when mother read aloud the stories of "Beautiful Joe" and "Black Beauty"?

Much of the joy of youth is inseparably bound up with dumb animals. Children instinctively are affectionate and kind to dumb brutes. That is the normal attitude toward them. As we grow older, however, we grow thoughtless and many are unnecessarily cruel to dogs and cats and the brasts of the field and the fowl of the air.

We owe a mighty debt to dumb animals.—Winnipeg Tribune.

Manitoba's Population.

The total population in Manitoba in 1920 was 341,466, according to the annual report of the vital statistics branch of the Provincial Government. The death rate for the province last year was 12.2 per thousand, a reduction of 2 per thousand over 1919. Births in 1920 totalled 18,356 as against 15,019 during the previous year.

Catarrhal Deafness Cannot be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure Catarrhal Deafness, and that is by a constitutional remedy. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed you have a running ear or imperfect hearing and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and the tube restored to its normal condition, hearing may be destroyed forever. Many cases of Deafness are cured by Catarrh, which is an inflamed condition of the mucous lining of the Eustachian tube. ONE HUNDRED DOLLARS for any case of Catarrhal Deafness that cannot be cured by HALL'S CATARRH MEDICINE. All Druggists 75c. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

New Creamery Plant Planned.

Several creameries had cold storage plants, construction of which was commenced last year, are to be completed as quickly as possible this summer by the Saskatchewan Co-operative Creameries. The new plants are at Yorkton, Weyburn and Melfort.

Among the Russian crown jewels, the whereabouts of which remain a mystery, is an emerald weighing six and three-quarter pounds.

Eyeclet Embroidery Is A Favored Trimming

By Marie Belmont.

One of the most interesting developments in the adorning of the new spring frocks and suits is the lavish use of eyeclet embroidery. It is exceedingly effective, as it permits the use of contrasting fabrics which add much to the beauty of the models. This dress, cut from soft folds of salmon chiffon is partly veiled by ecru batiste. The latter richly embroidered with eyeclets, is disposed in panels on the front of the dress. The lower part of the corsage is covered with the batiste which is cut in pointed style. A huge sash of chiffon is bowed at the waistline, and the long ends become panels that are much longer than the front of the gown.

Sickening Calomel Not Favored More Agreeable Medicine Described

"Calomel and Blue Pills are not used as they once were. When the head aches, when the stomach is upset, when the liver is not working right, don't resort to harsh calomel, use a pleasant agreeable remedy like Dr. Hamilton's Pills. Being largely vegetable in their composition, Dr. Hamilton's Pills are extremely mild, yet they surely flush out all impurities and wastes. No remedy is so well adapted for general family use. For constipation and bowel trouble, Dr. Hamilton's Pills can't be improved upon. Good for the young, the old, the sick, the well ones. The benefits of Dr. Hamilton's Pills are manifold. Needed and useful in every home, 25c all dealers everywhere or The Catarrh Co., Montreal.

Winnipeg Industries

City Has An Estimated Annual Payroll of \$24,308,982.

With an estimated capital of \$96,038,825, an estimated annual payroll of \$24,308,982, the output of Winnipeg's industries in 1920 was valued at \$120,213,000. Of this sum flour and grist mills absorbed \$14,487,398; slaughtering and meat packing, \$36,236; butter and cheese, \$2,905,648; bags, cotton, \$2,750,623; electric light and power, \$2,335,907; lumber products, \$1,818,567; bread, biscuits and confectionery, \$1,785,001; printing and publishing, \$1,785,001; malt liquors, \$1,663,905; coffee and spices, \$1,704,424; foundry and machine shop products, \$1,493,560; furnishing goods (men's), \$1,147,456.

The first successful aerial photograph taken by the British was one of Neuve Chapelle, in 1914.

ASPIRIN

"Bayer" only is Genuine

Warning! Take no chances with substitutes for genuine "Bayer Tablets of Aspirin." Unless you see the name "Bayer" on package or on tablets you are not getting Aspirin at all. In every Bayer package are directions for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve tablets cost few cents. Druggists also sell larger packages. Made in Canada. Aspirin is the trade mark (registered in Canada), of Bayer, a division of Monocet-acidester of Salicylic acid.

Prominent Western Man Praises Tanlac

G. W. Logan, Peabody, Kansas

"Tanlac has completely restored my health and I feel finer than in years," was the straightforward statement made recently by Mr. George W. Logan, of Peabody, Kansas, one of the most prominent stock-dealers in the Middle West.

"It has not only made a new man of me but I have actually gained thirty-five pounds in weight and feel as well as I ever did in my life. I am telling all of my friends about Tanlac but they can see for themselves what it has done in my case. When I began taking Tanlac I was in an awful run-down condition. I was away off in weight, felt weak and nervous all of the time and couldn't

take any interest in my work or anything else. My main trouble was indigestion. Nothing seemed to agree with me. At times I would have dizzy spells and at other times my back would ache so bad that I could hardly get up and down in my chair. This is just the condition I was in when I started to take this medicine. It took just six bottles to make a well man of me. I now have a fine appetite, everything tastes good and my digestion is perfect. My wife was also troubled with indigestion at times and it relieved her the same way. You may publish my statement wherever you like and if anyone doubts it, just tell them to see me."

Hands Across the Sea

Forget Minor Differences of View and of Prejudices.

In the hands of the American and of the English people lie the security and well-being of the human race. If Great Britain and America, whose ideals we firmly believe to be fundamentally in accord, can, in the next few years, be brought into closer appreciation, each as to the other's difficulties and problems; if they can be persuaded to forget minor differences of view and of prejudices; if they can grow to a common understanding of their mutual obligations and responsibilities to the world, they can become the leaders along the path of world progress.—New York Post.

Big Sale of Timothy Seed.

Growers of Timothy seed in the Pincher Creek district, Alberta, have recently sold 500,000 pounds of seed to a Chicago firm. The price paid was from 5 1/2 to 6 1/2 cents per pound.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Gray's Worm Exterminator, an excellent remedy.

Some Yield

An acre of ground planted with bananas will, it is estimated, produce nearly 20 tons of fruit, as each bunch of bananas weighs from 70 to 80 pounds.

Satisfaction in both Cans

Imperial Mica Axle Grease contains just enough powdered mica to form a smooth, hard surface on the axle which relieves friction and enables grease to do its work better. It prevents hot boxes and scored axles, and outlasts other greases two to one.

Imperial Eureka Harness Oil penetrates every fibre of leather, thereby excluding moisture, dust and sweat. It preserves harness, and prevents cracking and breaking of stitches. Harness that is treated with it lasts for years, looks well all the time and requires little repairing.

Ask your nearest dealer about these two high quality products. He has both in convenient sizes.

IMPERIAL OIL LIMITED

Power - Heat - Light - Lubrication

Branches in all Cities

It is the children who tax the Crown Brand factory to its capacity. There is some vital need of children that it satisfies better than anything else. That is why it does them so much good—whether used as a spread, as a table syrup, in baking, cooking or candy-making.

"The Great Sweetener"

House Cleaning Time

This is the busy season with most of the house keepers.—House cleaning time when the house furnishings are washed, cleaned or overhauled. No doubt another now will be required. Let us suggest—

Green Window Shades, Curtain Rods,
New Curtain Scrims, Muslin Drapes,
Congoleum Rugs, Linoleums

We have just received two new pieces of nicely designed linoleum. This No. 1 quality, real heavy material with a burlap base. These come 6 ft. wide and sell at \$2.75 per running yard or \$1.37½ per square yard.

Linoleums of lighter quality at \$1.00 per square yd.

Tennis Shoes

Spring time is sport time. Rubber soled footwear is popular. These are in white and black, and we have all sizes for Ladies, Men, Misses, Youths and Children. The Lifebuoy brand is the highest quality we can purchase and will give honest wear.

J. R. MILLER

Plow Shares

We still have on hand some old stock of Plow Shares which we are selling at the old prices. We have some of each of the following makes: Hamilton or Oliver, Cockshutt John Deere and P. & O.

SUR-SHOT BÖT and WORM REMOVER

Every day we have somebody in our store telling us the wonderful results they have had from this remedy.

Try some and be convinced yourself. Sold under an absolute guarantee. Call and let us tell you about it.

BARB WIRE—We are not keeping any Barb Wire in stock, but will order it in for you and in this way can save you money. Let us quote you a price.

"Yours for Service and Satisfaction"

Chinook, Alberta

Mother's Day Sunday, May 8

Next Sunday, May 8, will be Mother's Day, when special services will be held in the Chinook church at 3:30 in the afternoon 7:30 in the evening. During the afternoon service there will be a baptismal ceremony.

We have long erected public monuments to our great men, but have seldom dropped a flower on the resting place of the noble mothers who raised the gifted men and to whom most of the credit for the greatness belongs.

Miss Anna Jarvis, who we are indebted for this day, says: "This Mother's Day movement—making the second Sunday in May sacred to mothers—has nothing behind it but my belief of men and women as sons and daughters. Eventually it will create an all nation brotherhood that will stand for the protection of the mother and children. . . . the mother who works, the mother who is widowed—for, indeed, the preservation of the home itself!"

Attend Church next Sunday in memory of Mother!

Red Cross Campaign

"You cannot maintain an A-1 empire with a C-3 population. You cannot bring up healthy people in unhealthy homes," is one of the fine sayings uttered by Premier Lloyd George in a notable speech during the progress of the war, and this declaration is the backbone of the peace time health campaign being effected by the Canadian Red Cross, in its Dominion wide enrollment campaign that will be inaugurated during the latter part of May and the beginning of June, to secure the largest number of members for this society. "Every child born in Canada should have an opportunity of starting in life sound physical health, of growing to maturity in and through the healthful exercise of its powers and then of continuing to live in good health under wholesome conditions" until the full course of life is run," says Dr. Jas. W. Robertson, Chairman of the Canadian Red Cross, continuing he says: "Towards that end the Red Cross calls upon all intelligent men and women to join the crusade for good health and to join the Red Cross which can do more good for the country in peace time than it was able to accomplish in war."

Public spirited men who were connected with this vast organization during the war realized the vast mission that it would be called upon to fulfill when the war was over and the campaign that will be inaugurated next month is the initial step in turning the organization into peace time work. The project is meeting with approval across the Dominion, judging from reports which are already being received and organization officials predict that the result will be distinctly reassuring.

The dates for the Red Cross Enrollment in Western Canada are June 5 to 11.

Mr. Woodruff has obliged the public at different times by loaning them tools, etc., but he is now at a loss to locate an 18 inch jack screw loaned last fall. If you have it please return to him.

Boys Service

A very interesting service was held in the Chinook church on Sunday evening last, when the Trail Rangers ably assisted in the programme. Bobbie Hamon, the Chief Ranger, conducted the opening exercises and read the scripture lesson. Clinton Stata, the Sub-Chief, set forth briefly the laws and aims of the Trail Rangers. The boys choir, composed of members of the Trail Ranger group, sang three familiar selections from the Sacred Songs.

We wish the boys every success in this work, and hope to see them again taking part in the Church service.

Ladies Card Club

The card club held at the home of Mrs. Lee on Tuesday evening, April 26, found Mrs. Hewitt the prize winner. Which was a pair of cut glass vases. Mrs. Hewitt having made 151 points.

The meeting place last Tuesday was at the home of Mrs. Pollock. Mrs. Lee won the prize with 145 points. The prize was a painted plate.

The club will meet at the home of Mrs. H. Meade next Tuesday evening, May 10.

Langford Junior U.F.A. Sports And Dance at Rearville School, May 13

The Langford Junior U. F. A. will hold their Sports at Rearville School on Friday, May 13 at 4 p.m. sharp. A splendid program and good prizes. Over thirty events for boys, girls, men and women. Now's your chance to show yourself a real sport. Ever since Alberta went dry you have been longing to treat someone. This is an opportunity to help to send to local boys to the University at Edmonton for a week. So be present on May 13.

Grand dance in the evening. Entrance fee to the sports gentlemen 50 cts. Children not members of the Junior U.F.A. and of school age 25 cts.

Langford Social and Athletic Committee.

Mr. and Mrs. T. Lensegraf left Wednesday for Devonport, Iowa.

The Baseball Season Opens

The big leagues are already racing for the pennants, and the amateur and professional clubs in all sections of the country will soon be playing their opening games. Golfing and racing will soon be in full swing, and interest in sport in general is becoming keener with the coming of the summer months.

To keep in touch with sporting events, near and far, and to ensure your securing authentic reports you should read the Sport section of The Calgary Herald. Bigger and better than ever it is the medium that all lovers of sport look to for their sporting news. The special features on the sporting pages are alone worth many times the cost of Alberta's greatest newspaper, which is but 2 cts. a day.

Mr. H. Chouinard, who has been farming in the Chikmark district, has rented his farm and will go into the barber business at Stettler.

Brandram's Genuine B.B. White Lead

is a thoroughly tested and approved surface saver—it has held its world supremacy for almost 200 years. For those who prefer to mix their own, Brandram's Genuine B.B. White Lead, thinned with Turpentine and Pure Linseed Oil, as in B-H "English" Paint, makes a most satisfactory paint, for it easily outclasses all other white leads in covering capacity and permanence.

For those who prefer a prepared paint, Brandram's Genuine B.B. White Lead can only be secured in B-H "English" Paint.
